7. Write a report to the District Collector on "Republic Day Celebration" in your college. (12)
8. Read the passage given below and answer the questions that follow :

The design of a new motor car is the result of team – work. Engineers and Artists both work together. Broadly speaking, the engineers design the engine, the drive from the engine to the wheels (the transmission) and the hidden structures which support these items. The artists or stylists as they are known in the motor industry, decide the overall shape and interior layout in addition to colour schemes and chrome decorations.

The decision to start work on a new model is made by the Directors, who also decide certain overall details which are published in a secret document called a specification. This states the car's size, speed and performance, the type and the location of the engine and other basic details. The specification is passed on to the engineers and stylists who work in a well-guarded office where security is as strict as in a military camp.

- (i) What is the role of engineer's in designing a new car ?
- (ii) What do the stylists or artists do ?
- (iii) Who takes the decision to start work on a new model ?
- (iv) What does the specification contain ? (3×4)
